EXPERIENCE

CodSoft | Java Developer Intern

Nov,2024 – Dec, 2025

- Developed an ATM system in Java, including class creation, user interface design, and methods for transactions (withdraw, deposit, balance check).
- Designed and implemented a Student Management System in Java, featuring student data management.

PROJECTS

Railway Reservation System | HTML,CSS,PHP,MySQL

- Built the back-end with PHP and MySQL, implementing features like ticket booking and user authentication.
- Managed train list, seat availability, and journey scheduling to enhance the user experience
- Added a unique feature for finding indirect trains, improving journey options for users

Virtual Voice Assistant | Python

- Developed a Virtual Voice Assistant using Python, integrating libraries like pyttsx3, speech recognition, and wikipedia for voice interaction.
- Implemented features such as sending emails, playing music, checking weather, setting reminders, and searching Wikipedia.

Recipe Finder | Flask

- Developed a Recipe Finder application using The Meal DB API.
- Displayed random recipes, recipes by category and search-based recipe results.
